

I would like you to know that I have XM radio, and I like what I have. Having the ability to listen to stations that I like, and care about, including weather and traffic stations, is a right that I think I have. I also have a problem with people telling me that a station that I pay to listen to is going to be pulled off the air. If I wanted to listen to public radio, with all of it's attendant commercials, I would listen to that, and I sure wouldn't have paid for XM. NAB's petition 04-160 would limit what I could listen to, and I have a real problem with that. I paid for this programming, and it's only right that I should be able to listen to it.

Thank you for you time,

Mark D. Corso
